

Cómo Agregar agregar dinero a su cuenta

1- Luego de iniciar Sesión, debe ir a Dashboard:

The screenshot shows the website usatek.com/es/ with a navigation menu. The 'Dashboard' link is highlighted with a green box, and a green arrow points down to it. The menu items are: Inicio, Funcionamiento, Precios, Streaming, Mas Servicios, Dashboard, Descargas, Contacto, and Acceso. Below the menu is a support banner with the text: 'Soporte y ventas, Llámenos: 1 - (267) 388-9571 México (52) 55 -4170 8734'. There are also flags for Spain and the UK. Below the banner is a promotional text: 'Con Usatek podrá recibir llamadas de números locales internacionales en más de 50 países y reenviar la llamada a su teléfono fijo, celular, Gtalk, su proveedor VoIP o su IP PBX. Sin gastos de instalación.' Below this is an advertisement for Google AdWords with the headline 'Publicidad en Google AdWords - Alcance Nuevos Clientes' and a 'REGISTRATE GRATIS' button. On the right side, there is a customer service icon and a 'Atención al Cliente' button.

2- Para agregar Balance a su cuenta debe ir a MY PAYMENTS

The screenshot shows a web browser at the URL usatelk.com/es/dashboard. The page title is "Dashboard PBXww dashboard". On the left, a navigation menu lists several options: PBXWW PANEL, MY DETAILS, INVOICES, MY SERVICES, CALL HISTORY, SMS HISTORY, MY PAYMENTS (highlighted with a green box and a green arrow), and TICKETS. Above the menu is a user profile section with a "Desconectar" button. The main content area features a "PBXww Service" window with a "Launch PBXww" button and a "Service Description" section. The description states: "Advanced Call Forwarding (PBXww) is an extremely powerful and easy-to-use tool for managing and directing incoming phone calls, essentially operating as your own hosted telephony service. By using the PBXww control panel, you are able to easily receive calls from local numbers, forward calls to any phone number or VoIP destination, play back custom recorded messages to callers, direct calls using extension numbers, send calls to a voice-mail box, receive faxes and forward them to an email address and host conference calls. Advanced Call Forwarding is quickly and easily configured via a web interface, with drag-and-drop objects being connected together to control exactly how the call progresses. This platform is applicable for personal and business use." A "Atención al Cliente" banner is visible at the bottom right.

3- Ir a Add Payment
